SKILLS

Languages : Java, JavaScript, HTML/CSS, MySQL

Tools : Git/GitHub, VS Code, Canva, Netbeans IDE

PROJECTS

HotStar Clone | *HTML/CSS, Bootstrap, JavaScript*

[View Project](#)

- Created a visually appealing and user-friendly frontend clone of the popular streaming platform Disney+ Hotstar, leveraging HTML, CSS, and Bootstrap for responsive and intuitive design.
- Demonstrated initiative and self-directed learning by independently developing a functional frontend for a prominent streaming platform.

Billing System with Invoice Generator | *Java, Apache NetBeans IDE, GUI, Wamp Server*

- Developed a GUI-based billing system in Java, facilitating the generation of invoices for each sale.
- Implemented a complete store billing system with a focus on GUI framing for enhanced user interaction.
- Collaborated with a team of two members
- Created and managed the database "Caddey", with three tables, ensuring seamless data management for the billing system.

Image Search Engine | *HTML/CSS, JavaScript, Unsplash API*

[GitHub Repository](#)

- Developed a visually appealing and intuitive image search engine, applying user-centered design principles to streamline the search experience for diverse users.
- Utilized the Unsplash API within a custom-built image search engine, enabling users to efficiently find and explore high-quality images through tailored search queries.

EXPERIENCE

Oasis Infobyte *Frontend Developer Intern*

Feb 2023 - Mar 2023

- Participated in a internship program focused on web development, applying skills later used to build the Image search engine.
- Designed and implemented responsive UI components, enhancing user experience across devices.
- Collaborated with teams to ensure project deliverables met requirements and contributed to a seamless user experience.

TRAINING / COURSES

JAVA : Apna College | *Java, Data Structures*

Aug 2022 - Oct 2023

- Advanced course covering Java programming and data structures.
- Developed proficiency in object-oriented programming and algorithmic problem-solving.

Bootcamp : DevTown | *Frontend Web Development*

June 2022

- Focused on HTML, CSS, and Bootstrap for modern web development.
- Designed responsive and visually appealing web pages.

MySQL : Great Learning | *Database Management with MySQL*

May 2022 - June 2022

- Covered relational database principles and SQL querying.
- Learned to design efficient database schemas and optimize performance.

VOLUNTEERING

Coordinator and Anchoring: College Fest

- Coordinated techAcme 2k23 and anchored college fest.
- Organized a mega event for techAcme 'Fashion show'.
